

Chesapeake Neurology Associates (CNA) is proud to present the latest cutting- edge tools for the assessment of the cognitive physiology of the brain. A cognitive EEG is a comprehensive electro- physiological assessment of the brain both at rest and in response, to visual, auditory and cognitive stimuli. This analysis is useful in investigating brain dysfunction in a variety of settings, including attention deficit disorder, head injury, stroke, dementia and other brain dysfunctions.

We will make an effort with your insurance company to obtain reimbursement for the cost of this test, all insurance companies are not the same are in what they will cover in regards to testing, and may not be up to date with this state-of-the-art technology in their reimbursement pattern.

For patients with medical insurance, CNA will submit to your insurance provider. Most insurance companies will cover the components of the EEG. However, CNA does not guarantee that each of these items will be allowed by your insurance company. Please know, you will be financially responsible for any non-covered service. Please check off the items below, noting you accept financial responsibility.
